

# Liquid Disposal

Soda, water, and other liquids not only add weight to your recycle stream, but can ruin an entire batch of recyclables and redirect them to landfill. Max-R Liquid Disposal streams prevent this and provide ease of use to end-users, encouraging them to follow and support your recycling initiatives.

8 GALLON	21" W x 21" D x 38" H	OX-LQD8
18 GALLON	25" W x 25" D x 38" H	OX-LQD18

## FEATURES

### EASE OF SERVICE

Quickly and easily swap out units while in service. To empty, simply open the nozzle on the side of the unit into a floor drain or sink.

### ELIMINATE SPLASHING

A standard splatter pad prevents fast-flowing liquids from splashing on the bin, over the side, or onto the end-user.

### CHOOSE THE RIGHT CAPACITY

Available in both 8-gallon and 18-gallon capacities, select the appropriate size for each location's specific needs.
