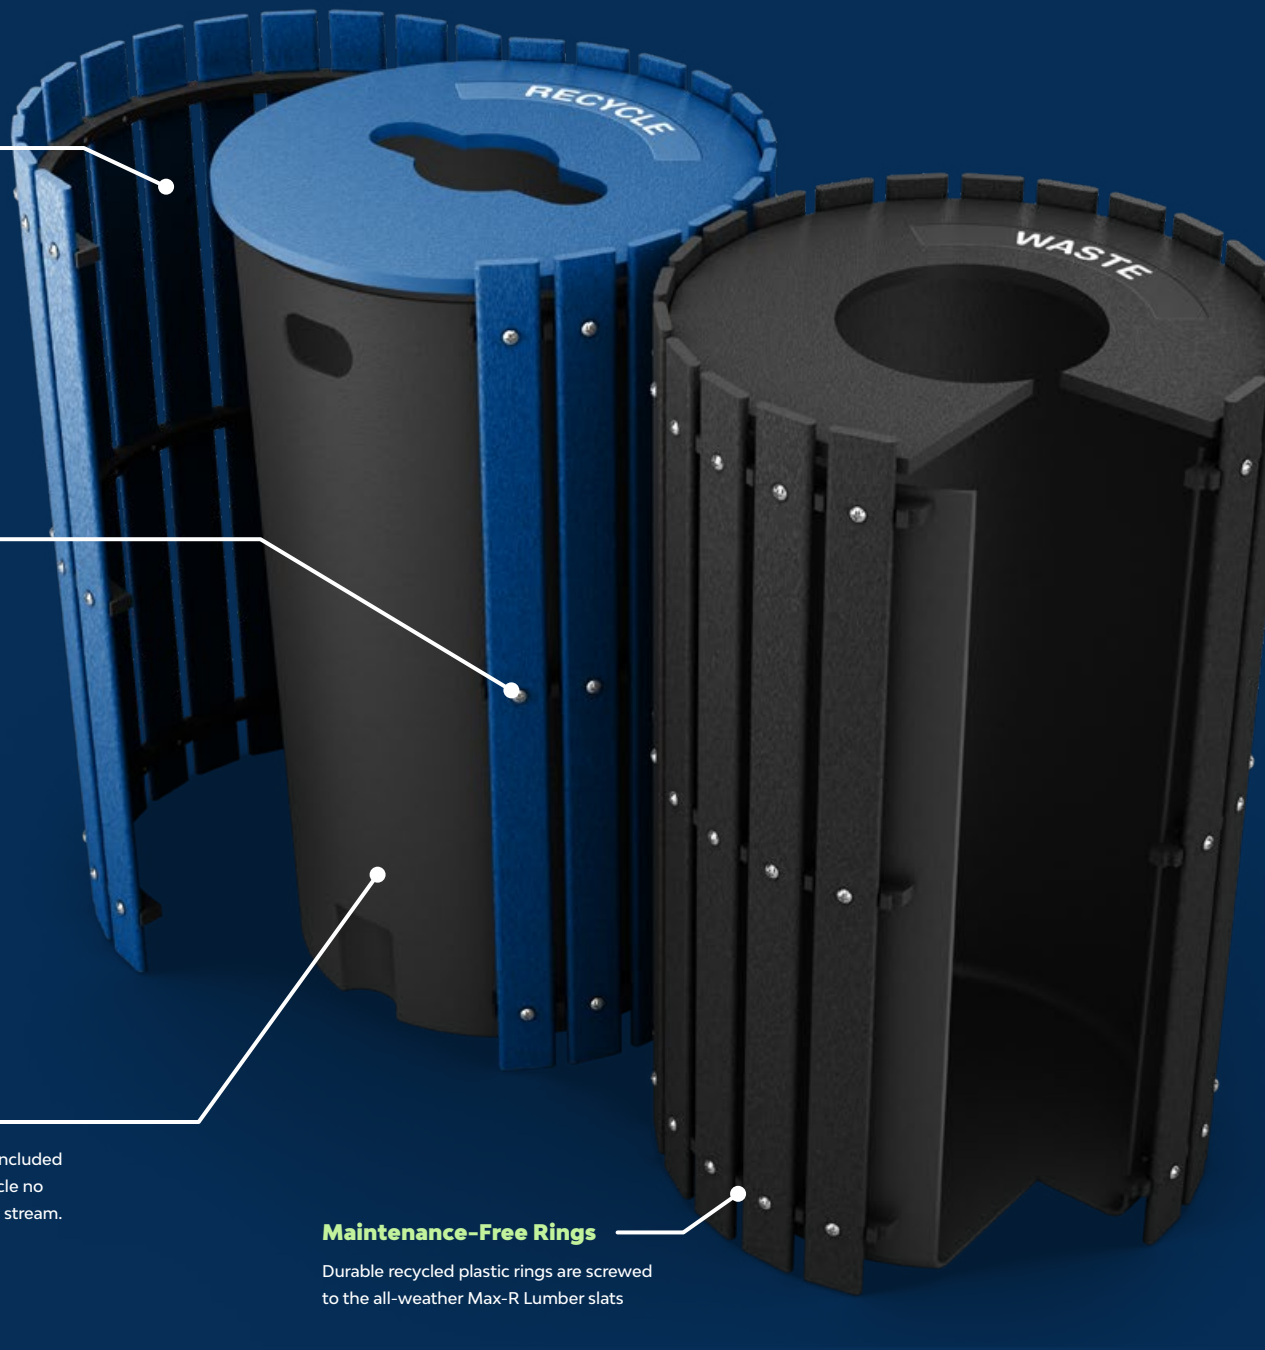
# Why Infinity

The Infinity Series features the classic round receptacle style and are available in a variety of gallon capacities. The slatted appearance and maintenance-free rings allow you to leave the waste and recycling bins in any environment while telling a unique sustainability story.



### Hinged Door

Efficiency and serviceability at each bin keeps your costs down and minimizes safety hazards.

### Rust-Free Hardware

Our fasteners are made from 316 marine-grade stainless steel and won't corrode or rust over time.

### Rigid Liner

All rigid liners are included with each receptacle no matter the chosen stream.

### Maintenance-Free Rings

Durable recycled plastic rings are screwed to the all-weather Max-R Lumber slats

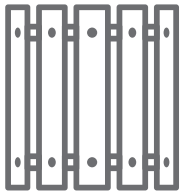
# How to Order

**The Infinity is so much more than a blue bin.** We believe that your waste and recycling program deserves a thoughtfully planned receptacle that will meet all of your functional and aesthetic needs, your brand standards, and will foster the growth of your sustainability program. Before considering your color combinations, stream diversion, and branding, configure your Infinity receptacle for each locations' specific requirements. Gallon capacity, the number of streams, and top style can all be customized to meet your functional needs.

## Choose Construction



Fastened

Barrel

## Choose Number of Streams

**Split available in 55 capacity only*

Single, Double, Triple

Split Double, Split Triple

## Choose Gallon Capacity

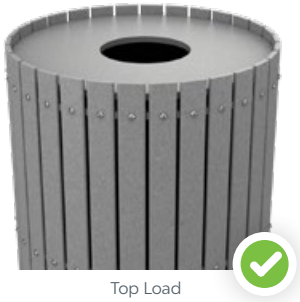
# Define your Scope

When determining the scope of your program, several variables need to be considered. These fundamental choices need to be the first step: optimal location (inside or outdoors), properly-sized capacities, and fine-tuned configurations is imperative for any successful sustainability program.

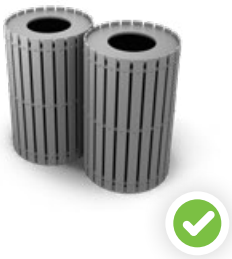
## Loading Style



Top Load

## Number of Streams

Single



Double

Triple

## Configurations

# Choose Your Mounting Style

The Infinity can be placed indoors or outdoors, but when placed in an outdoor, public environment, it is best to choose a mounting style that suits your needs the best. While mostly serving to provide a more sturdy base for your round receptacle(s), the post can also provide eye-level messaging or even branding.

# Select Your Colors

Infinity utilizes rings and slats made from Max-R Lumber™, comprised of 95% pure grade recycled materials embedded with UV inhibitors and colorants. Mix and match panel, post, and top colors to create a unique solution that adheres to your unique branding, sustainability mandates, or surrounding aesthetics.

## Color Combinations

Mono Tone

Split Color

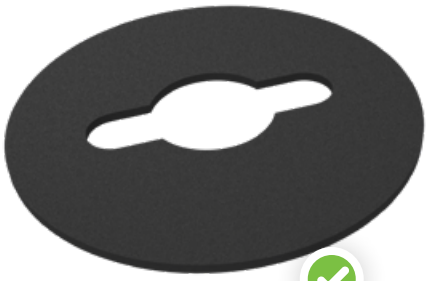
# Identify Your Streams

Cross-contamination is the enemy because it hampers your sustainability efforts and costs you money. Get ahead of it by creating effective visual cues focused on your openings through the use of color, restrictive openings, and effective labeling. With interchangeable openings, you can future proof for ever-changing goals and needs.

## Restrictive Openings



Standard

Double Split

Triple Split

## Opening Labels

Standard

# Add Graphics

Graphics, symbols, and logos add some effective touches that really make the receptacle your own. Symbols and graphics help to further support your stream identification while logos help end users take pride in—and become loyal to—your green efforts.

# Choose Hardware

Now that you've customized your receptacle into the ideal tool in your sustainability program, some additional function may be needed. With our engineering knowhow, and over 20 years of experience, we have developed extra performance to help increase serviceability across many different customer scenarios.

### All Season

Suitable for all climates; stands up to rain, snow, wind, salt spray, and sunlight—leave outdoors all-year.

### Pure Recycled Material

Made from purest-grade HDPE and may contribute to LEED® goals under MR 4.1 & MR 4.2.

### Durable

Won't rot, split, or delaminate. Solid color throughout ensures a "like new" look for years to come.

### Closed Loop

Purity allows material to be recycled multiple times, all scrap is collected for future products.

### Regional Footprint

The majority of our raw materials are sourced from within a 150-mile radius of our facility in Sussex, Wisconsin.

### LEED v4 Credits

Fulfills credits in the Building Design and Construction category of LEED v4 rating system, potentially earning up to 9 credits.
